TITLE	Graduate Student Admissions Survey, 1976. Report No. 1-77.
INSTITUTION	State Univ. of New York, Albany. Central Staff Office of Institutional Research.
PUB DATE	Jun 77
NOTE	46p.; Some parts may be marginally legible due to print quality of the original document
EDRS PRICE	MF-$0.83 HC-$2.06 Plus Postage.
DESCRIPTORS	*Admission (School); Dentistry; Doctoral Degrees; *Enrollment; Graduate Medical Education; *Graduate Students; *Graduate Study; Law Schools; Masters Degrees; *Statistical Data; *Student Application; Veterinary Medicine
IDENTIFIERS	*State University of New York

ABSTRACT

This report provides data on the number of applications received, the number of applications accepted, and the resultant yield of enrollees in graduate programs at the State University of New York. The data in this report includes only those applicants who have applied for admittance into a degree program and only those resulting enrollees who have been accepted into a formal degree program. PREFACE

This report is the sixth report on graduate student admissions prepared by the Central Staff Office of Institutional Research and Analytical Studies.

This report provides data on the number of applications received, the number of applications accepted, and the resultant yield of enrollees in graduate programs. The data is arrayed by program level for all of those senior institutions of the State University of New York which offer graduate programs. The census period spans a full year, commencing with the close of registration in the fall of one year and continuing through the close of registration in the fall of the following year. For example, the data presented for 1976 represents the period beginning with the close of registration in Fall 1975 and ending with the close of registration in Fall 1976.

The report is divided into two main sections. Section I (tables 1-8) contains the 1976 data for individual institutions and institutional types and it is arrayed by program level, i.e., master's programs, doctoral and graduate certificate programs, and first-professional (M.D., D.D.S., Pharm.D., O.D., D.V.M., J.D.) programs. Section I also contains separate tables for M.D. and D.D.S. programs. Section II (tables 9-12) contains trend tables covering 1972, 1973, 1974, 1975 and 1976. The 1976 data in Section I is repeated in the Section II trend tables in order to facilitate comparisons.

The data in this report includes only those applicants who have applied for admittance into a degree program and only those resulting enrollees who have been accepted into a formal degree program. The scope of the University's graduate application and enrollment activity is understated in this report because it excludes those graduate students who applied, were admitted and enrolled during the census period, but who were not in a degree program. This represents a substantial proportion of the graduate activities of the State University. For example, in the Fall of 1976, 44 percent of the total graduate enrollment was composed of graduate students who were not in a formal program. This report also excludes those graduate students who entered the institution prior to the census period.

The collection and preparation of the data included in this report involved the efforts of a number of individuals. We would like to express our gratitude to the campus personnel who were responsible for gathering data at the campuses and submitting it to this office. Our appreciation is also extended to this office's statistical staff of Mses. Gorden, Hallenbeck and Waingrow, who were responsible for the editing and verifying of the data; and the typing staff of Mses. Dallmann, Jegier and VanHattum, who prepared the final typescript for publication; and Ms. Healey, who was responsible for the proper distribution of the publication.

Associate

INTRODUCTION

Different types of graduate programs exhibit considerable variation in application, admission and enrollment patterns. In addition, different institutions offer different levels of graduate programs as well as providing different emphases in their program structure. Consequently, the data in this report should be viewed against the general programmatic structure of the State University institutions. The information in this section is designed to provide a profile of the University's offerings at the graduate level. It is relevant to understanding the distribution of graduate programs among the individual institutions and institutional types of the State University of New York.

All of the senior institutions of the State University of New York offer graduate programs at some level with the exception of Empire State, Old Westbury and Purchase, which have no graduate level programs. Following is a list of those institutions and institutional types which offer programs arrayed by the level of the graduate program.

MASTER'S PROGRAMS: Master's degree programs are offered at the University Centers, University Colleges[a] (except for Empire State, Old Westbury and Purchase, which have no graduate level programs), Health Sciences Centers, Specialized Colleges, and the Statutory Colleges.

DOCTORAL PROGRAMS: Doctoral programs are offered at the University Centers, Health Sciences Centers, Statutory Colleges, and the College of Environmental Science and Forestry.

FIRST-PROFESSIONAL PROGRAMS: First-professional programs are offered at the Health Sciences Centers (all four of the Health Sciences Centers offer programs in Medicine, in addition Buffalo and Stony Brook offer programs in Dentistry, and Buffalo offers a program in Pharmacy); the University Center at Buffalo offers a program in Law; the State College of Optometry offers a professional program in Optometry; and the New York State College of Veterinary Medicine offers a professional program in Veterinary Medicine.

GRADUATE CERTIFICATES: Graduate programs leading to Certificates of Advanced Study are offered at the University Centers and selected University Colleges and Health Sciences Centers.

---

[a]Master's programs at the College at Utica/Rome are offered under the degree authorization of the State University Colleges at Cortland and Oswego.

The State University offers a wide variety of graduate programs at its various senior institutions; these programs span a broad range of subjects. The scope of graduate offerings reflects the wide diversity of interests and goals of those students who seek out a State University institution to pursue graduate studies.

This variety of programs makes it necessary to aggregate individual programs into types of programs in order to make possible a summary of the structure of the University's graduate programs. Therefore, in the following tables, the University's graduate programs are aggregated into groupings identified as "Discipline Divisions" by the U.S. Department of Health, Education and Welfare in its annual surveys of higher education. That categorization of programs is referred to as the HEGIS (Higher Education General Information Survey) taxonomy of instructional programs. Within this taxonomy there are thirty groupings or major Discipline Divisions. Only those Discipline Divisions within which the State University offers graduate programs are entered on the following tables.

The following tables indicate the level of graduate programs offered within each HEGIS Discipline Division; data is provided for each institution as well as for institutional types.
